

# Analysis of Technology trends

Özge Güneş

October 2025

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Context of data and analysis goals.
- Methodology description
  - Data gathering
  - Data analysis
  - Data presentation & visualizations
- Future Technology Trends
- Implications in relations to the overall findings highlighted
- Key-take-aways related to analysis, and presented data

# INTRODUCTION

---

- Analyze and present findings in relation the technology trends in software- and web development among developers around the world
  - Analyzed data from Stack Overflow's annual developer survey covers extensively what the current programming languages are, and which future trends are to be expected.
- Purpose of analysis:
  - Highlight current- and future soft (or eventual hard) requirements, for future jobs related to understanding of tech. languages.
  - Highlight demographical factors, related to tech. (country, gender)
- This analysis hold relevancy to;
  - Programmers
  - IT industry leaders
  - Comp. science students

# METHODOLOGY

---

- Collecting survey data and gaining an understanding of given data.
  - Web scraping
  - APIs
  - Request libraries
  - Data Wrangling
  - Data cleaning
- Data Visualization
  - IBM Cognos (dashboards)
- Presenting our findings

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top 10 languages worked with according to respondents

## Next Year

Top 10 Languages desired to learn according to respondents

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript and HTML-CSS leading tech. languages.
- Interest in Python increasing
- Increasing interest in TypeScript And Kotlin

## Implications

- Favor of status quo. JavaScript/HTML-CSS leads as the languages the most desire to learn.
- Python's increase in popularity is in accordance to assumptions, as it is a leading language used for AI

# DATABASE TRENDS

## Current Year

Top 10 Databases worked with according to respondents

## Next Year

Top 10 Databases desired to learn according to respondents

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL leads as the most frequent used database
- PostgreSQL retains fairly high levels of use
- Decline in popularity and use in Microsoft SQL

## Implications

- Favor of status-quo. Open sourced databases preferred.
- Increased interested in NoSQL databases like MongoDB and Redis.
- PostgreSQL has a fairly high interest comparatively to use

# DASHBOARD

---

Link to the read-only view of the Cognos dashboard:

# DASHBOARD TAB 1

## Current Technology Usage

Top 10 languages worked with according to respondents

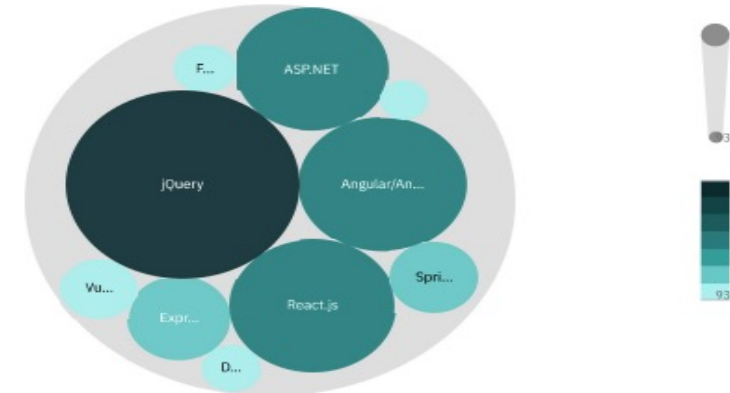

Top 10 Databases worked with according to respondents

Platforms most frequently used according to respondents

Top 10 WebFrames worked with according to respondents

# DASHBOARD TAB 2

## Future Technology Trend

Top 10 Languages desired to learn according to respondents

Top 10 Databases desired to learn according to respondents

Desired Platform for Next Year according to respondents

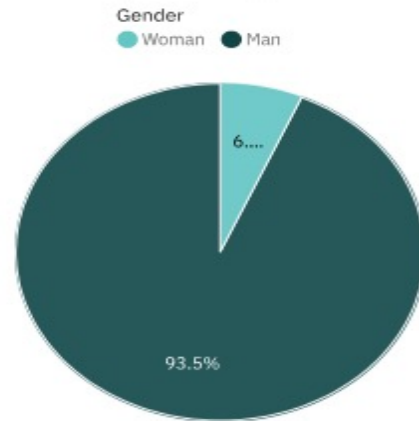

Top 10 WebFrames desired to learn according to respondents

# DASHBOARD TAB 3

## Demographics

Respondents by Gender

Respondents by country

Respondents by Age

Respondents by gender, classified by formal education level

# DISCUSSION

---

- Impact and overall value of tech popularity- and usage in emerging countries and economies
- Lack of females represented in demographics of analyzed data
  - A real concern in terms of discrimination, or statistical bias due to survey data?

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript retains its popularity, and is overall desired to be learnt
- Male dominated field
- Users- or people highly interested in developing usually come from more established countries (USA, Western Europe)

## Implications

- Little changes annually, although noSQL databases have seen a significant boost in desire to learn/popularity
- Majority of developers, have a formal education
- Need for higher degree of inclusion; lack of females

# CONCLUSION

---

- Technology trends
  - On par with previous years, with some slight changes in popularity related to a few key programming languages and databases.
- On-going development and need of IT/ in emerging economies/countries.
- Underlying demographical trends
  - Age, gender, country

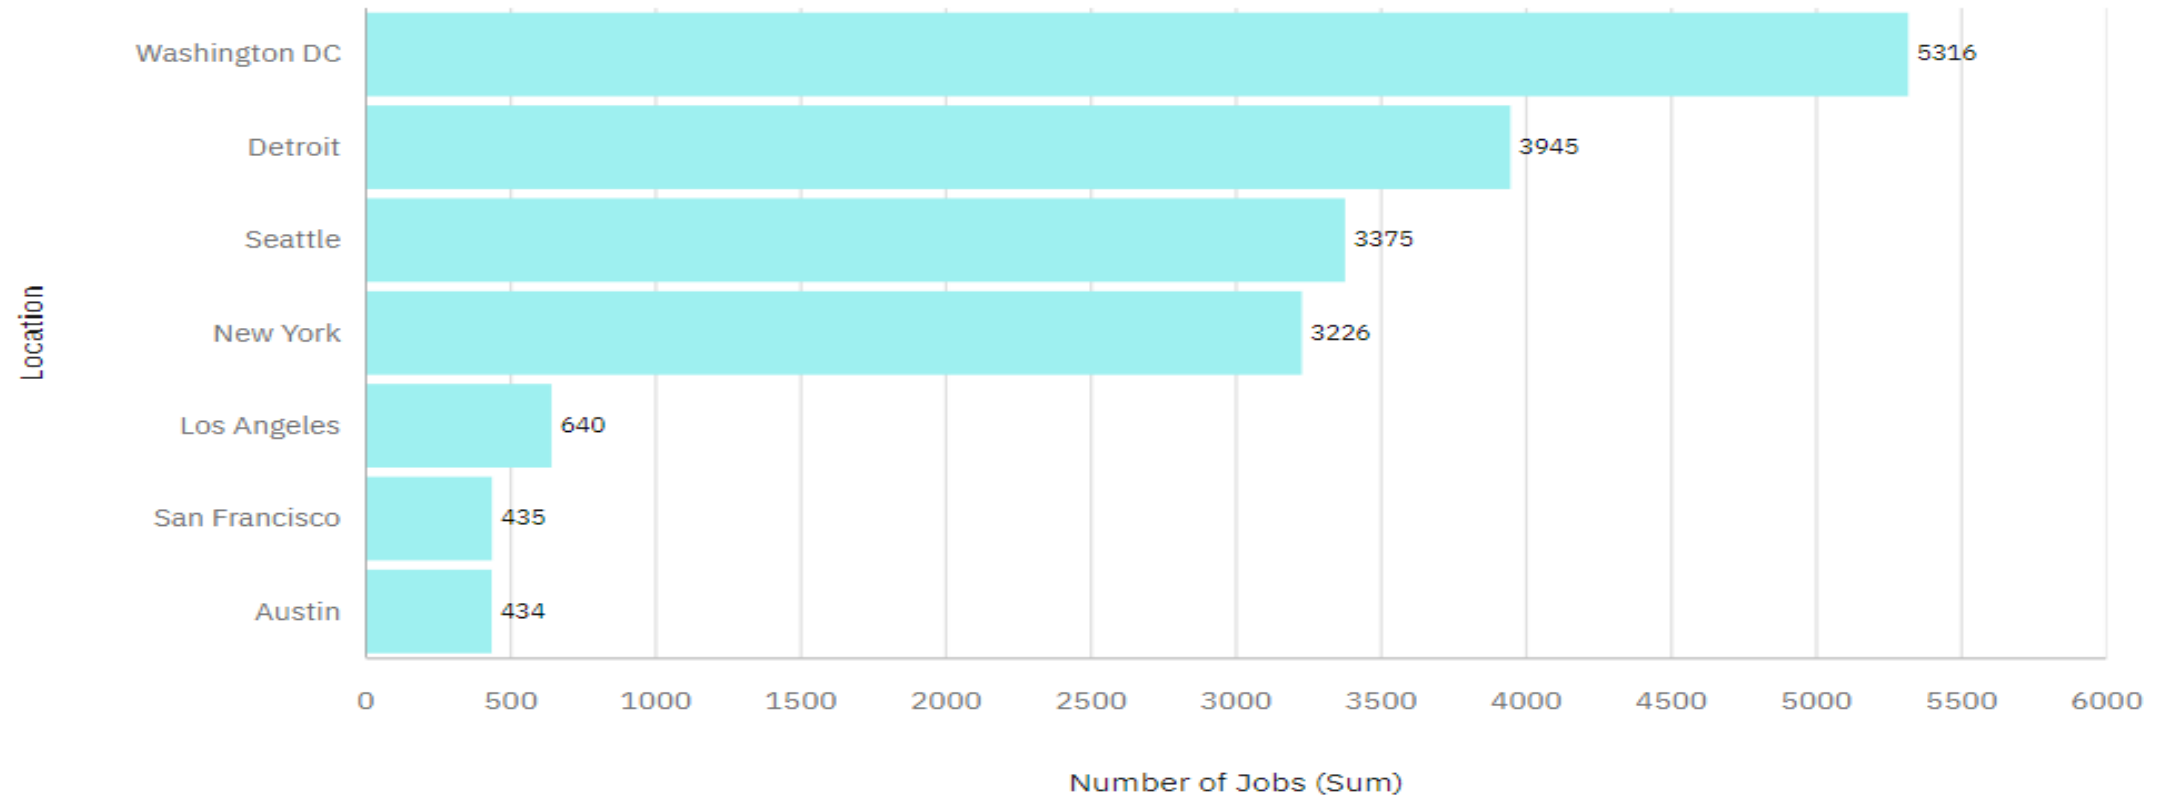

# APPENDIX

---

# JOB POSTINGS

Number of Jobs by Location

# POPULAR LANGUAGES

Average Annual Salary by Language
